9 - Which parts of this course were most valuable to your overall learning experience?

Response Rate 7/14 (50%)

- Really enjoyed learning from Professor Trudeau, she is a top notch individual and I hope more teachers aspire to bring the same energy to the subject matter as Professor Trudeau does.
- Comparative politics
- The opportunity to put our skills into practice through the problem set assignments that allowed us to apply what we have learned in the classroom to the creating of maps utilizing QGIS.
- I really enjoyed our workshop days were we focused on the program QGIS, it really helped me develop a passion for my final project and put into perspective the lessons we talked about as a class on Mondays. I'm so happy I learned about this program and learned how to use it and hope that I take the skills I learned to my other courses.
- The QGIS PS and SW's were challenging, but in the best way; I think they were the most valuable. They introduced me to brand new material and ways to analyze topics of political science/ international relations.
- The way the course was structured made it engaging.
- I believe learning how to use QGIS and Storymaps was most valuable to my overall learning experience. Having completed my final project, it looks incredibly professional and is a great reflection of what I have learned this semester. Additionally, these are skills I can carry over in the job market that make my work look very professional.

10 - Which parts of this course would you suggest changing?

Response Rate 6/14 (42.86%)

- n/a
- /
- None
- Maybe more in-depth directions for skills workshops, so when applying those lessons to our problem-sets there is less confusion. As someone who had no QGIS experience when beginning the course, the step-by-step directions are super helpful (although not always necessary).
- Maybe just more in-class preparation for the final project.
- I would suggest adding a TA to the course for the QGIS. Often times, I felt many students had the same questions or issues. Additionally, we would ask similar questions each week. Having another TA/ instructor who is familiar with the software would allow questions during class to get answered faster. Additionally, the TA could hold office hours to work on QGIS skills. Personally, I felt those were the hardest parts of the course but also the elements of the course I can utilize forever.

11 - What specific advice would you give to improve student learning in the course?

Response Rate 6/14 (42.86%)

- ask questions, speak, think deep...
- /
- None, the instructor is doing an excellent job at pairing real life information that is relevant to the creation of spatial data.
- I think having Wednesday's be allotted to QGIS work (PS & SW's) was super crucial to student learning.
- I think it is perfect the way it is.
- I believe a TA would be very helpful given the difficulty of working with QGIS, especially at the beginning. Additionally, when signing up for this course, I was unaware that there would be this much use of QGIS.

12 - Which parts of this course were most valuable to your overall learning experience?

Response Rate 7/14 (50%)

- attending the lectures and the skills workshop.
- Comparative politics
- Being allowed to find the answers by ourselves. We were provided all the tools we needed, but the assignments did require some proactive learning and backtracking into the course material.
- The QGIS program. I wish we got to learn more skills!
- The QGIS PS and SW's were challenging, but in the best way; I think they were the most valuable. They introduced me to brand new material and ways to analyze topics of political science/ international relations.
- The workshops and problem sets allowed me to actually understand what I was doing in QGIS.
- QGIS and Storymaps

13 - What did you like and dislike about the final project?

Response Rate 7/14 (50%)

- I like the freedom to explore ideas that are meaningful / interesting to you and then apply the core learnings from the class to come to deeper insights.
- The ability to choose our own subject
- We did not explore ArcGIS that much, it is still somewhat ambiguous to utilize it, though it can be understood how intuitive the platform is. It would be helpful to create a story map in class, as a group, to have an understanding of how to actually use ArcGIS.
- I think there is a lot of room to be creative and I really appreciate the creative freedom. Maybe next time we should be given a list of websites we should look at and if we still can't find data on our topics then we can resort to other resources.
- Loved that we got to choose topics that interested us and were able to apply what we learned in the course in any kind of manner to our topics.
- I like that we can do whatever topic we are interested in. I dislike that we did not have more time using story maps.
- I loved how professional my project turned out and how it can be updated in the future.
