10 - Which parts of this course were most valuable to your overall learning experience?

Response Rate	3/3 (100%)
• The most helpful part of the course was the Wednesday lab where we completed a QGIS workshop as a class. Any time I struggled to perform a portion of the day's task, Dr. Trudeau helped troubleshoot and explained the process of making the maps in a straightforward and helpful way. I leave this class feeling confident to continue refining my GIS skills. Additionally, the problem sets were a fantastic way to reinforce what we learned in the skills workshops. Between the skills workshops and the problem sets, the class is structured in a way that maximizes reinforcement of the key skills Dr. Trudeau wanted us to develop. Such methods training is invaluable and deserves a permanent spot on the course offerings. • Problem sets and skill sets each week were very helpful to demonstrate what we have learned. I think having a whole class dedicated to skills workshop was super useful. I also appreciated the detailed slides that we can refer back after class to remember the skills. • I think this class is really helpful for providing the students hands on experience with the software, meanwhile it combines well with the theoretical depth. Professor is really passionate about this area and is super helpful in navigating us through the learning process. Would definitely recommend this class.	

11 - Which parts of this course would you suggest changing?

Response Rate	2/3 (66.67%)
• Not necessarily a change, but both parts of this course (substantive [Mondays] and methods [Wednesdays]) were strong enough to stand apart as separate courses. I think this course could have been broken into two different class listings with one focused on the politics of mapping and the other focused on using mapping programs for political science inquiry. This is beyond the control of the instructor as listings are finite, but this class has a lot of potential to expand into something much larger and more routinized if it continues to get green lit. • Not really
